FIGHT FOR **OUR** WORK

New York State is about to submit its plan to the Federal Government to spend nearly \$1 BILLION on broadband deployment and we need to make sure our recommendations are included in the plan. With big funding dollars comes out of state, fly-by-night contractors looking to make a quick buck with cheap labor, and we need to make sure the work goes to highly-trained, unionized broadband technicians - us!

**We're
Fighting
For:**

- *Fiber-optic technology wherever and whenever possible!*
- *Prioritization of high-road employers who have:*
 - *A directly-employed workforce*
 - *Robust in-house training*
 - *Locally based workforce*
- *Transparent and enforceable workforce plans*
