

DATA FOR PROGRESS

From December 15 to 18, 2023, Data for Progress conducted a survey of 1,169 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,169 unless otherwise specified.

[1] When thinking about the issues that are important to you, which best describes how you feel about climate change?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White	Latino
Climate change is one of the most important issues to me	32	51	34	11	33	32	37	30	31	35	40	30	38
I care about climate change, but it is not one of the most important issues to me	48	43	47	52	50	45	46	49	48	46	47	48	44
I do not care about climate change	17	3	15	34	15	20	11	20	17	16	4	20	14
Don't know	3	3	4	3	3	3	6	2	4	2	9	2	4

[2] Recently, the United States attended the United Nations Climate Change Conference with other nations from around the world. At this event, the U.S. and other nations conducted the first Global Stocktake, which assessed how much progress countries across the world have made on international climate goals set by the Paris Agreement in 2015.

This report finds that while significant climate progress has been made since 2015, countries are not currently on track to meet the goal of reducing warming to 1.5 degrees Celsius.
